

Benzer

October 14, 1956

Dear Sy: *Benzer*

Could we persuade you to pay us a visit sometime this fall? I am very anxious 1) that my students meet you, and 2) to compare notes on the ultimate recons — we're fairly deeply involved now in the Lac<sub>1</sub> and Gal segments.

We are not replete with travel funds, but I can guarantee your actual expenses & we'd be very happy if you'd stay with us as we have lots of room. (Bring Alan too if he's inclined, but we can only pay travel for one at a time). This is an informal, personal invitation for a research conference; you won't have to make any speeches unless you particularly want to, though I would ask you to review the latest in a seminar (at home) for the lab group.

Just to name one date, which is fairly soon, Nov. 1 would suit us fine, but name any other that would fit your convenience. I'll be away next weekend otherwise will be fairly uniformly at home.

Yours sincerely,

Joshua Lederberg
